PROFILE	Infrastructure software engineer building self-service platforms for engineers and the AI agents working beside them: deployment workflows, infrastructure as code, CI quality gates and MCP tools.	
EXPERIENCE	Ngernturbo / Infrastructure Software Engineer JUL 2025 – PRESENT	
	The platform engineers use to ship. A Next.js web app and AI agents call a Go gRPC backend; a NestJS worker and RabbitMQ hand work to Jenkins, which provisions AWS through Terragrunt.	
	DEPLOY WORKFLOW	End-to-end deployment tickets: a multi-step release wizard linked to Jira and Fast-ship, plus redeploys to production that only certain roles can run.
	SELF-SERVICE STORAGE	Developers request S3 buckets from the web UI, and Jenkins and Terragrunt provision them with versioning and lifecycle rules. Existing buckets can be brought under the same management.
	CI AT SCALE	A SonarQube quality gate across CI, including .NET; deployment manifests generated automatically for older Go, Python, C# and JS repos; and a move of old Jenkins jobs to the new flow that can be undone.
	AI-READY PLATFORM	An MCP gateway that lets AI agents use platform actions, limited by the user's role, plus Claude Code skills for the infra team.
	ACCESS CONTROL	Role-based permissions, whitelist approval tickets, and scheduled branch freezes.
	iPassion / Intern Developer JAN – JUN 2024	
	Built web applications on the OutSystems low-code platform for enterprise clients.	
	SCG	Reworked the layout and interaction design of an existing application.
	AIS	Internet package management with feature matching and a back-office console.
PROJECTS	Finance demo trading platform 2026	
	A paper-trading environment for practising without risk: refreshing prices, an order flow you can actually use, and a news feed for context. TypeScript · Next.js · PostgreSQL	
	Taxi ads CMS 2024–2025	
	Final-year capstone built for a partner company: a back office for the ads that run on taxis, from campaign setup through to the numbers they produce. AdonisJS · TypeScript · MySQL	
STACK	LANGUAGES	Go · TypeScript · Java · JavaScript · SQL
	BACKEND AND APIS	gRPC · Protobuf · Spring Boot · Node.js · NestJS · AdonisJS
	FRONTEND	React · Next.js · Vue.js · Tailwind
	DATA AND MESSAGING	PostgreSQL · MySQL · MSSQL · MongoDB · InfluxDB · RabbitMQ
	CLOUD AND IAC	AWS · Terraform · Terragrunt · Docker · Nginx
	CI/CD AND QUALITY	Jenkins · GitLab · GitHub · SonarQube · Playwright · Vitest · Grafana
	AI TOOLING	MCP servers · Claude Code
EDUCATION	King Mongkut University of Technology Thonburi (KMUTT) 2021–2025	
	BSc Information Technology, School of Information Technology (SIT)	
CERTIFICATES	TOEIC Listening & Reading Score 680 ETS 2025	AWS Cloud from Zero to Production Udemy 2025
